Posters.**

GMI's Solvent-Print Media Translucent Backlit is the ideal solution for both photographic and high quality signage applications where vivid color saturation and extreme image resolution is required.

Because of its capacity to replicate colors from a very wide color gamut, SPMTBL offers maximum color density with vivid and high output resolution.

And with advanced ink adhesion technology, SPMTBL bolsters internally-illuminated signage applications for increased viewing performance.

GMI's Solvent-Print Media Translucent Backlit is the optimal choice for your specific backlit application needs.
