For your specific viewing application, convert to the appropriate RGB or CMYK equivalent.

To give you flexibility in reproducing accurate color guides, GMI Series 700 vinyl colors were measured in the LAB color space, a uniform device independent color space. These LAB values are intended only as a source of information. They are given without guarantee and do not constitute a warranty.

Due to color gamuts — the range of colors that can be reproduced in a specific color space or on a specific device — reproduced colors in any application may appear different.
